Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The followings are Examiner's questions/suggestions:

In Claim 1 (line 1), should “;” be removed?

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 14-16 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 14 and 15, it is not clear as to what “the like” refers to.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1712

5. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukagoshi (US 4 740 657).

With respect to Claims 1-4, Tsukagoshi discloses an adhesive film comprising electroconductive particles having a polymeric core such as silicon resins, polyethylene, etc. and an electrically conductive thin metallic layer coated thereon (col. 3, lines 22-37 and col. 4, lines 47-68) and a polymeric matrix such as silicone rubbers, polybutadienes, polychloroprenes, etc. (col. 8, lines 21-34).

With respect to Claims 5 and 11-12, the metal coating can be Ni, etc. (col. 6, lines 4-10) or a Ni/Au composite layer (col. 6, lines 46-58).

With respect to Claims 6-10, the size of the electroconductive particles can be 1-300 μm and the thickness of the metal thin layer can be 0.01 to 5 μm (col. 6, line 59 to col. 7, line 29). The particle size can be further exemplified as 3, 5, 25 and 50 μm (Table 1). A particle having a size of 200 μm with 5 μm coating of Ni (density 8.9) has a Ni coating of about 65 wt% of the particle because the typical density of the polymeric core is about 1.

With respect to Claim 13-19, Tsukagoshi further teaches a method of applying the electroconductive adhesive onto a substrate (Examples). Note that since the electroconductive adhesive is electrically conductive, it inherently provides EMI shielding to the substrate. *In re Best*, 195 USPQ 430 (CCPA 1977).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuo-Liang Peng whose telephone number is (703) 306-5550. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

Art Unit: 1712

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Dawson, can be reached on (703) 308-2340. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
